

Next level pea protein performance.

Growing consumer demand for nutrition sourced from plant proteins, means well-recognized food ingredients, such as pea protein are becoming more popular. ADM's pea protein portfolio offers tremendous functionality with great taste, enhanced texture and mouthfeel to help you develop on-trend, label-friendly applications.

The flexitarian lifestyle continues to gain momentum, creating a greater demand for plant-based foods and beverages.

59% of global consumers* identify as **following a plant-forward lifestyle.**¹

*includes global Flexitarians, Vegetarians, Vegans

What's driving growth?

Health | Variety | Protein Diversity

ADM's research shows that **health is the number one consideration globally for consumers choosing plant-based solutions** (across meat & dairy alternatives and specialized nutrition).² In addition, **consumers are looking to bring more variety and protein diversity into their diets with plant proteins.**³

Plant protein? Yes, peas!

Market Potential

Global food and beverage product launches containing pea protein have **increased by 76% in the last five years.**⁴

Consumer Approved

Pea protein is a consumer-approved alternative protein. The top three attributes global plant protein consumers most associate with pea protein are:²

1st

Healthy/Nutritious

2nd

Tasty

3rd

Clean/Natural

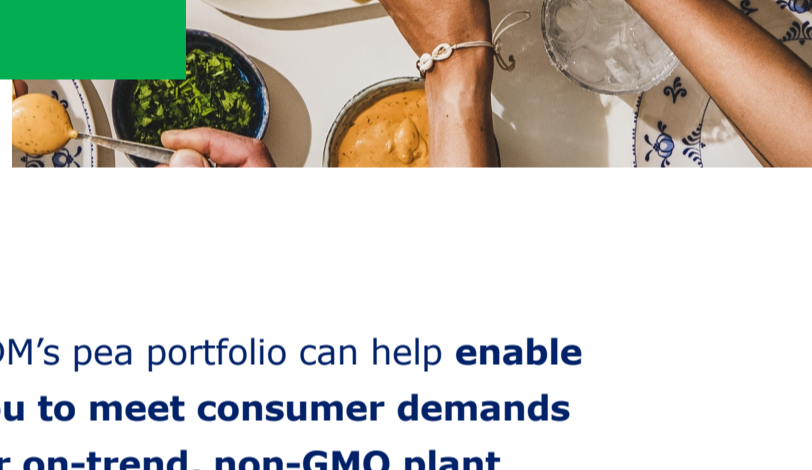

Our pea protein portfolio is a formulator's dream.

ADM's growing portfolio of powders, blends and textured pea proteins offers optimization across a wide variety of protein-forward applications.

Count on our pea proteins to deliver:

- + Clean taste
- + Light color
- + Diverse functionality
- + Non-GMO
- + **65-80% minimum protein content (on moisture-free basis)**
- + **North American and European grown, sourced, and produced options available**
- + **No mandatory allergen labeling required**

Protein with performance in mind.

ADM's pea portfolio can help **enable you to meet consumer demands for on-trend, non-GMO plant protein nutrition.**
